Art Unit: 1751

DETAILED ACTION

Specification

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes." etc.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 45-49 are rejected under the judicially created doctrine of double patenting over claims 1-8 of U. S. Patent No. 6241915 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

Page 3

Application/Control Number: 09/844,824

Art Unit: 1751

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: An epoxy comprising: a liquid mixture of a hardener and a base epoxy resin; and a concentration of an ionic salt within the liquid mixture, the a concentration of the ionic salt, such as LiN(CF3 SO2)2, LiAsF6 being high enough that a 15 mil length sample of the liquid mixture having cross-sectional dimensions of 50 mil by 2 mil would have a resistance of less than about 100 ohms along its length in less than or equal to about 30 minutes of forming the liquid mixture, the concentration of ionic salt being high enough that the 15 mil length sample of the liquid mixture having cross-sectional dimensions of 50 mil by 2 mil would have the resistance of less than about 100 ohms along its length while having a viscosity of less than 100,000 cps., further comprising silver particles. It would have therefore been obvious to one of ordinary skill in the art at the time the invention was made to create the instantly claimed epoxy comprising a liquid mixture of a hardener and a base epoxy resin, an ionic salt and silver particles in view of the reference.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application, which matured into a patent.

Allowable Subject Matter

Claims 50-68 are allowed.

Application/Control Number: 09/844,824

Art Unit: 1751

The following is an examiner's statement of reasons for allowance: Furthermore, the references differs from the instantly claimed composition recited in claim 50, because they fails to disclose the use of a lithium salt in an epoxy resin in an amount to in an amount to impart a 15 mil length sample with of the liquid epoxy sample of the liquid epoxy mixture having a cross sectional dimensions of 50 mil by 2 mil exhibiting a resistance of less than 100 ohms along the length with a viscosity of 100,000 cps or less produced by the instantly claimed method. Furthermore, the references do not appear to disclose the required amounts of each of the instantly claimed components and there is no motivation to combine all of the references cited nor is there motivation to alter the amounts of the components they disclose. Thus, it would not have been in the preview of the skilled artisan to practice the instantly claimed method for making a composition containing a liquid epoxy resin in which silver powder is dispersed, an alkaline earth metal salt in an amount to impart the instantly claimed properties in view of the references cited.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Derrick G. Hamlin whose telephone number is (703) 305-0590. The examiner can normally be reached on Monday-Thursday and alternating Fridays from 8:30 AM - 5:00 PM.

Application/Control Number: 09/844,824

Art Unit: 1751

If reasonable attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dr. Yogendra Gupta, can be reached on (703) 308-4708. The fax phone number for this Group is (703) 872-9310.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0661.
